

Here is a list of my beginner tips on how to verify if information is correct.

- 1. Use fact checking tools such as google, wikipedia or bit.ly/fact-search*
- 2. Find the original source, verify the source, check other sources.*
- 3. Try typing the headline into google with the word Hoax*
- 4. Understand if the writer is an expert or real person.*
- 5. Try using Tin Eye to do a reverse image search to see where the articles photo originally came from.*
- 6. Talk to people around you. Ask their opinion*
